Dynamic cell height in tableview I have a table view controller with dynamic height cells that has a master-detail style, but I'm having an issue. How can I control the height of the master view cell? I have set

my delegate's heightForRowAtIndexPath and

heightForHeaderInSection. It works fine for all the cells except the master cells. Here is the function of heightForHeaderInSection: -

```
(CGFloat)tableView:(UITableView *)tableView
```

```
heightForHeaderInSection:(NSInteger)section { if(section == 0) {  
return 76; } else if(section == 2) { return 55; } return 50; } A: Try using
```

a UITableViewDelegate instead of your UITableViewController. The delegate will be called whenever the table is reloaded and I can be sure that heightForHeaderInSection will be called prior to the table being reloaded. If you use your current implementation, you'll be modifying the height of the header when the table is reloaded. Q: Directive don't compile when I try to replace innerHTML on load I'm trying to learn Angular and I want to have a div with innerHTML containing a content.

The idea is to update the content when the div is clicked and to have
