I want to make my wordpress page (link) to contain and show some of the output from the search below.

TIP: Currently, to capture the output of the search, you will need to use a tool to capture the HTML of the site. A tool such as Microsoft's Internet Explorer. Use its "View" tab to inspect the HTML. You will see a collection of different items on the page.

Which one is the search result?
Hint: Use your 'back' button on the browser to return to the search page. Find the wordpress page that has the search results. Paste the 'HTML' of that page in the search box. Click 'Search'. You should get the result. There is probably also an easier way to do this.

Please feel free to add your response as a comment. I would greatly appreciate it. Thanks. A:

As other suggested you can use Google Custom Search API, just fill in the form here: and in the

result page use this code to retrieve the page: "yoursite.com" %2Fcse%2Fhome%3Fcx%3Dpartner%3:XXXXXXXXXX%2Byyyyyyyyyyyyyyy-yyyyyyyyyyyyyy What is the smallest value in -0.5, $\frac{4}{5}$, -0.2, -0.1, $\frac{6}{5}$, -3? -3 What is the second smallest value in 1.7, 0, $-\frac{2}{5}$, -5? $-\frac{2}{5}$ Which is the second smallest value? (a) -0.1 (b) -0.5 (c) -0.12 (d) 10 (e) 3 c Which is the fifth smallest value? (a) -4 (b) -14 (c) 3 (d) $\frac{4}{19}$ (e) 2 c Which is the third smallest value? (a) -1 (b) $-\frac{2}{9}$ (c) $-\frac{3}{5}$ (d) 3 (e) 2d92ce491b
