How can I make the List scroll while content is being added? A: SwiftUI's List by default is scroll-able. It has no way to stop scrolling until the user gets to the end of the list. You can hide the List that's in the Storyboard or Xcode XIB file by adding a ScrollView, and then add the List to the ScrollView. You can also add a ScrollView in the Xcode file, then add the List to the ScrollView. If you want the ScrollView to adjust to the List when it grows, you will need to add an ObservableScrollView. EDIT: I wrote a blog post about the ScrollView/List, that's here. A: Seems like a bug. The width of your ScrollView needs to be at least as wide as the whole List plus any spacing/padding. , but I must leave this day." "Farewell." "Is it true, Andrea?" "Did you kill him?" "Is it true?" "Andrea..." "Is it true?" "My dear Giuditta, if that were true I wouldn't have the strength to leave here." "I've been frightened." "And I've been lying to myself." "But I know the truth now." "The truth is that I have nothing." "Till soon be dead." "There 2d92ce491b
