Poker Night 2 has you play as aspiring poker pro?dsc3t?, as he attempts to make his big break. Along the way, you will complete missions, win tournaments, and battle against other poker players online in a bid to become the king of the game. But before you become the next poker pro, you have to be able to actually play poker? Time to take on another city with Poker Night 2! GameSpot Review In what is becoming a tradition for Netflix, its wholly owned gaming subsidiary has once again come out with a brand new video game. Instead of starting with a new series, this time we have an expansion to an existing video game, with Poker Night 2. We've taken a look at Poker Night 2 to see if it's as fun as the original game was, and is it something you should be playing? Our review of Poker Night 2 may be biased, as we've played a number of other games with the same company's name, but this certainly isn't your typical poker game. It's a completely different feel that stands up on its own. Of course, the game still has its own thing going for it, such as the same cards and characters that were a part of the original, but there's a whole lot more to the game than just that. Over all, this is a fun game for fans of the series, and an intriguing way to start your online poker career. In the Game The game is set in a fictional city, where you play as poker professional?dsc3t?, as he tries to turn his career around. Instead of playing poker in a casino, you're playing in your own home, and can even have your friends as players, creating a more comical feeling of the actual game.

The game begins as you take part in a tournament, and you can choose which table you want to sit at. Then, you can choose to start out with a bankroll that grows over time, or a smaller one that doesn't grow, that way you don't have to worry about money falling behind. You can also choose to play against or with your friends. The matchmaking system allows you to choose who you want to play with, and your friends, though you can always have a full hand of 10, if you want to. Gameplay is pretty straightforward. You can choose to play Hold 'Em, Omaha, or Seven Card Stud, depending on your preference. Your goal is to win as much as you can, while trying to get the most money out of each hand. You can use this money to increase your score multiplier, buy your own chips, and even customize a new character. The graphics and sound are perfectly fine for the casual player, with a bit of polish here and there. The sound effects and graphics are simple, while the characters look like they're drawn from comic books. The only issue that
