OpenEye MPEG-2 TS Analyzer is a tool developed to serve a specific purpose, to analyze and debug DVB tables along with MPEG-2 transport streams. MPEG transport streams are standard formats that are used to transmit and store audio and video data for the DVB broadcasting system. These can be either from a recorded or live source and the application is capable of opening files in.TS and.MPG formats. OpenEye MPEG-2 TS Analyzer allows you to load the stream and decode it in such a way that it is readable for humans. It can handle PAT, NIT, PMT, BAT, SDT, TOT, TDT, EIT and CAT MPEG-2 and DVB tables. OpenEye MPEG-2 TS Analyzer displays a comprehensive interface which enables you to load the source file and after a short analysis of it, the application displays the results in two separate sections. One contains the structure of the file, while the other can offer you detailed information. You are able to export the data in HTML and XML formats, as well as save EPG data along with corresponding thumbnails. As an analysis tool, OpenEye MPEG-2 TS Analyzer allows you to view charts for PID usage, signals and video bitrate along with error reports, EPG grid and the video mosaic. Moreover In case you need to, the application enables you to reset continuity, CRC and section counters, as well as the PID chart. In closing, if you're familiar to what it means to analyze and debug DVB tables, then you can certainly give OpenEye MPEG-2 TS Analyzer a try.
