Here are 20 surprising facts about AutoCAD: 1. The original AutoCAD program was written in UCSD Pascal and ran under MS-DOS. The first AutoCAD was written in UCSD Pascal, a version of the operating system/ Pascal, and was used in a variety of applications in the 1980s and early 1990s. The software was licensed to a number of other companies, including Autodesk. 2. AutoCAD was originally called the AutoDrafting Program and was intended to be used to draft

architectural blueprints and similar documents. In 1979, the Autodesk Autotrader software was released, which included a basic drafting package. The program had been running under a variant of the UCSD Pascal environment. The name AutoDrafting came from the idea that with the program, "you could do a better job drafting than a draftsman!" Autodesk renamed the AutoDrafting Program AutoCAD and rewrote the code to make it more useful for the rapidly growing computer-aided design market. AutoCAD was launched in 1982 as a

desktop program that could read and write both 2D and 3D files. 3. AutoCAD is probably the most successful CAD program of all time. AutoCAD is the second-most-downloaded application on the Apple App Store, and was downloaded more than 3 million times on the Google Play Store. 4. AutoCAD received five PC Magazine Editors' Choice Awards. In 2006, 2009, 2010, 2011 and 2012 AutoCAD received PC Magazine's Editors' Choice Award for CAD Software. 5. AutoCAD is compatible with more than 250 different languages.

Language translation is one of the most challenging areas of the software. AutoCAD has been translated into dozens of languages. 6. AutoCAD was certified to work with materials with 0.5 percent oxygen content. In the late 1980s, AutoCAD had the ability to read and display materials with up to 1 percent oxygen content. AutoCAD was the first product of its kind to be certified for such materials. 7. AutoCAD has gone through five iterations of software development. AutoCAD 2014 was released on October 22, 2013. This release

marks AutoCAD's fifth major revision. 8. AutoCAD's default background is the 2D view

A dig in Israel in 1992 suggested the Great Hypostyle Hall (or the Great Entrance) had been built in the tenth century, a date since confirmed by Carbon dating of plaster from the

great hall. Israel experts also believe that the Israelites took massive amounts of brass from the Tanis excavations (about 1,250 tons worth) as the Israelites were the only tribe that had a monopoly of the metal as it was too costly for the other tribes. (I've also heard of another theory that it was brass that the Romans used to fence their camps and put a "bull's head" on the top which was recognized by the Israelites as their national emblem and metal) Fun Fact: Check out the black-topped huts at the Tel Maresha site on Wikipedia.
