Determine the best way to solve the fraction.Q: How to fix the keypad to work on my Galaxy Mega? I own a Samsung Galaxy Mega. I'm really not happy with the keypad on it. It has a physical keypad which I really do not like. That is, it is a piece of plastic which does not feel good. I am trying to see if there is a way to move the keypad to the sides instead of on the front. I thought it might be able to be done using a keyboard app. I've tried some of them, including the popular SwiftKey, but it does not seem to work on it. This is because it is set for the devices back key and not the "side key" for scrolling up and down on my phone. Is there any way to get this to work? Would moving it to the sides be a function of the mobile OS? A: You can use Smart Keyboard app to make the physical keyboard work like a normal keyboard. For that you have to connect the device to PC with USB and follow some procedure. Download the app. Open it and connect the device. Click on "Settings" option. Select "Language" and make your device language as "English (United States)". Now click on "Keyboard" and check "Enable keyboard". Now you can see the physical keyboard with each key and it is working like a normal keyboard.
