FIFA is the world's most popular and authentic soccer video game, available on any console or handheld device. FIFA delivers a deep authentic simulation of the beautiful game including live, real-time strategy and passing, shooting, and dribbling. FIFA 19 is available for Xbox One, the all-in-one games and entertainment system from Microsoft, PlayStation 4, and PC. Virtual Team and Player Depth In addition to all the individual skill and depth found in FIFA 19, in FIFA 22, the new virtual player and team depth brings you even closer to the real soccer experience. Virtual Player and Team Depth FIFA 19 featured thousands of players and groups of up to 40 players, but in FIFA 22, we've created a virtual player and team depth that emulates the real thing. Every player that you see on your teamsheet is a true-to-life recreation that you will find in real matches, no matter which club they play for. Multiple Offsides Algorithms Offsides are a hallmark of soccer. In FIFA 19, a new offsides system was introduced. The new on-pitch system uses a combination of live on-field data and smart algorithms to calculate an offsides decision, addressing issues with artificial intelligence and the long-held offsides debate. Real-Time Depth As your team of players run and walk around the field, the new depth system will adjust to keep players moving and provide more realistic depth. As you take a throw-in, for example, the line will go out to the expected position of the first opponent, helping to drive focus and keep you from fouling a player that you didn't intend to. Quick Turf Conversion Stay on your toes at all times during matches. A new Quick Turf conversion will keep you on your toes. If a player misses a pass or just slows down, the Quick Turf will make a player quickly transition on to their new feet. Breathing Life into the Referee Use a big ball or a small ball to change the size of the ball that you're calling. Give the ref control over a certain area of the field. Give players a specific task. Show the ref, your opponent, and even your teammate who is about to take a free kick. Smart AI FIFA

Ultimate Team will now be smarter than ever. With nearly
